NRM's prize exhibit moves to Shildon

The National Railway Museum brought together two icons from the history of steam locomotives on 22nd June, with just a mere 71 years between them! The A1 Steam Locomotive Trust’s Pacific Tornado and NRM’s star-exhibit Mallard were on display together for the first time.

Crossrail project moves forward

The developers for Crossrail’s final inner-London station at Woolwich have said that the project is still under review, as it is the only station dependant upon private funding.

Discussions are ongoing between the developer, the Department of Transport (DfT), Transport for London, and Crossrail to secure a way forward. A DfT spokesperson said: “All efforts are being made to broker a solution, but we have to be clear that we cannot simply default to the taxpayer picking up an additional cost to Crossrail that has never been within the funding programme”. The station is a key part of a planned Royal Arsenal development that will feature 3,700 homes.

The developers Berkeley Homes said: “We are very grateful to the support and guidance provided by Crossrail Ltd during recent efforts to close the gap in funding. We hope that following these developments we can progress design and commence on site over the coming weeks”.

The first images of a new, improved, and significantly cheaper scheme for the proposed Crossrail station at Whitechapel have been revealed. Crossrail says that its new plans include ‘a whole host of upgrades’ that will benefit passengers and local residents and at the same time simultaneously deliver substantial savings compared to the original proposals. Tower Hamlets Council had objected to the layout of the station, particularly the idea of putting the main entrance on Fulbourne Street. Now the entrance is on Whitechapel Road, which the council believes is a ‘great improvement’. Plans for a tunnel providing access from Dooryard Street to Whitechapel Road have been scrapped in favour of a covered overhead footpath. This it is said will entail less disruption for local residents during building works, and is also thought to save an estimated £30 million. The Crossrail line is due to open in 2017, with a high profile line-up of architects designing the central London stations.

Crossrail has announced a design competition, which challenges undergraduates to develop a concept design for a station platform seat. The winning designer will be selected by an expert panel and offered a one-year fixed term contract. With few practical restrictions for the concept, final year undergraduate design students are being encouraged to unlock their creative thinking. The competition is part of a wider programme of engaging with students and young people to inspire the next generation of tunnellers, engineers, designers and construction workers.

A computer generated impression of how the new modern-style Whitechapel station could look. Crossrail

FGW honours 'GWR175'

Playing a further part in the 175th anniversary of the Great Western Railway, First Great Western has reliveried one of its Class 57/6 locomotives.

Freshly released from the paintshop wearing GWR green with cast name and numberplates, together with a GWR shield plaque, Class 57/6 No. 57604 Pendennis Castle was shown off to enthusiasts and the public alike on 20th June at the Great Western Society base at Didcot Railway Centre.

The new-look ‘57’ recommenced its regular work of hauling First Great Western’s ‘Night Riviera’ sleeper service last week.

Looking resplendent in its new GWR green-livery, and recreating images of the 150th anniversary celebrations when four Class 47 locomotives were similarly treated, No. 57604 Pendennis Castle poses on the turntable at Didcot on 20th June.

New railfreight terminal planned for Castle Donington

Plans for a large new railfreight terminal that would allow large containers to be transported to Castle Donington from deep-sea ports in the UK and link up with the European rail network via the Channel tunnel have been revealed.

Work will start in January on creating a rail connection to the Castle Donington site after a property firm signed a multi-million-pound deal with Network Rail. It is anticipated that the link will attract large companies to its East Midlands Distribution Centre scheme, and once they have signed up, further millions will be invested in building warehouses for them, creating a 120-acre distribution hub, which could be up and running by the end of 2012 and could employ up to 2,000 workers.

The work to connect the site, which will be off junction 24 of the M1, from the existing Birmingham to Nottingham freight line, involves reinstating tracks, signals and points. This £10 million aspect will be overseen by Network Rail, which estimates that it will be complete by the summer of 2011.
New data available to 'App' programmers

New information about London’s Tubes, buses and river services is being made available online to allow web developers to use it to create products such as mobile phone applications to help passengers.

Transport for London (TfL) has removed its restrictions on commercial use of its travel information, and has released several sets of data for download. Henceforth, developers will not have to ask for permission if they are making money from applications built on TfL data.

The London Datastore includes free access to information on planned weekend Tube works, the location of stations, licensed taxi operators, Oyster card top-up points and piers on the River Thames.

Tyne & Wear investment confirmed

The Government has confirmed the commitment to invest up to £350 million in modernising the Tyne and Wear Metro.

The Chancellor said that the Metro was ranked among a number of transport projects that provided substantial benefits to the economy. Nexus, will now go ahead with its plan to transform the system over the next 11 years. The commitment means modernising trains, stations and the infrastructure.

Following the takeover of the day-to-day operation by DB Regio, the first metrocar set has moved from South Gosforth to Wabtec Engineering for refurbishment.

Summer guided tour programme for Ribblehead

The Friends of the Settle & Carlisle Line have announced the return of the popular archaeology summer guided tour programme of the Ribblehead Viaduct and Blea Moor Tunnel area.

Everyone is welcome on these free walks, and they provide a fascinating insight into how the engineers and navies won their hard-fought battle against the elements to build the line at this bleak and dramatic location. The tours will take place every Wednesday in July and August, and those interested should simply turn up at the Ribblehead Station Visitor Centre by 10.25 – connecting with trains from both Leeds (depart 08.49) and Carlisle (depart 08.53).

There are two tours to choose from. The first takes approximately two hours and is around the area of the Ribblehead Viaduct. The second takes about four hours, visiting various points in the first tour and then continuing to Blea Moor tunnel. For both it is essential to bring boots or strong footwear, together with waterproof clothing. Both walks cross rough ground and it can be very wet in places.

On the full day tour, participants are advised to bring a packed lunch with them.
Main line services in and out of London Paddington were severely disrupted on 23rd June, following the theft of 300ft of signalling cable at West Drayton. Only one train per hour could run in each direction between Paddington and Oxford, Penzance via Bristol, Swansea and Castle Cary, for Glastonbury. After overnight work, services were restored to near normal the following morning. The theft resulted in all signals on the four lines in and out of Paddington turning red, and as a result only one of them could be used fully, with one completely out of action and two partially disrupted.

Work to reorganise traffic flows around Reading town centre have begun ahead of the £400 million revamp of the station. Reading Borough Council said the work has been planned over four phases to try to minimise disruption. The first phase in St Mary’s Butts will continue until the end of July, and will involve changes to the road layout and installing necessary street furniture. Phase two will take place in Friar Street West and Station Road, and will run from August to mid-September. Phase three, in Friar Street East and Valpy Street, and Phase four, in Station Approach and Blagrove Street, are due to be completed by May 2011. The work to the station includes five new platforms and a new station entrance.

Changes have been announced by Heathrow Express that will bring all Heathrow terminals within 23 minutes of London Paddington. The company is introducing a set timetable between Heathrow Central and Terminal 4, which is synchronised with the existing 15-minute interval service from Paddington to Heathrow Central and Terminal 5. The services from Paddington to Terminals 1, 3 and 5 will remain unchanged, taking only 15 minutes to Heathrow Central and a further 6 minutes to Terminal 5. The trains will depart Terminal 4 at 12, 27, 42 and 57 minutes past the hour. As part of this, Heathrow Connect Class 360 No. 360205 has been rebranded into Heathrow Express livery and will be used on the shuttle between Heathrow Central and T4.

It has emerged that money earmarked to pay for a planned new railway station at Bromsgrove has been frozen. The new station should have been finished by Easter last year, but it is still at the design stage. The Bromsgrove Rail User Group said: “If this is an example of the public spending cuts we can expect for the future, then there is concern about what the future holds for us”. At the current station the northbound platform is shorter than the southbound one, and too short for some trains to stop.

### Chiltern on target for completion of ‘Evergreen 3’ in 2011

Upgrade work for the £250 million Chiltern Railways ‘Evergreen 3’ scheme to bring London Marylebone within 100 minutes of Birmingham Moor Street station, and Banbury to within an hour, is scheduled for completion before the end of next year.

The project will provide an alternative to the West Coast route during the redevelopment of Birmingham New Street station, the first stage of the work from Banbury to Marylebone to be followed by the construction of a new rail link between Oxford and the Chiltern main line, via a new stretch of line in Bicester.

This is subject to Transport and Works Act approval, but the link, planned for delivery by 2013, is set to be the first new rail line between London and a major British city in over 100 years.

### Borders Railway moves close to reality

With all the necessary land having been acquired to allow construction of the Borders Railway from Edinburgh to Tweedbank, the project has now moved another step closer.

Transport Scotland has announced its intention to invite three organisations, consisting of seven of Europe’s biggest construction and financial companies, to tender for the contract. The individual companies include those responsible for some of the biggest rail projects in Europe in recent times, including the high-speed links between Amsterdam and Belgium and figure as to Perpignan in France, the East Coast Main Line upgrade, the London Underground Connect Project and Manchester Metrolink. It is anticipated that the award of the contract for construction of the line will be made in winter 2011, with main construction work also beginning at this time. The project is estimated for completion with train services running in 2014.

### Track laying commences on £300 million Airdrie to Bathgate rail link

A 200-tonne ‘mobile factory’ has begun laying track on the new Airdrie-Bathgate rail link at a rate of up to a kilometre a day as part of the construction of the new £300 million line.

The NTC machine, which is over 100 feet long, will lay track along the path of the new 15-mile stretch between Airdrie and Bathgate. The machine will lay 14km of track (7km in each direction) between Bathgate and Blackridge over a three-week period this month, before returning in July and August to complete the full length of the line.

The new link will provide up to four trains per hour on a new electrified route between Edinburgh and Glasgow, and will link communities along the line with a passenger rail service for the first time in over 50 years.

GB Railfreight Class 66/7 ‘flag unit’ No. 66705 Golden Jubilee, heads past a field of wheat and poppies near Manea, Cambridgeshire, with the afternoon Felixstowe - Doncaster Railport Intermodal service on 17th June. Julian Hodgson
Technical problems hit '57s' on loco-hauled diagram

While the reliability of the Virgin Class 57/3s has never been exemplary while working for GB Railfreight on the First Great Western loco-hauled diagram, the figures for the past few weeks make for depressing reading.

Sunday 13th June
Caped Cardiff Canton - Taunton (ECS)
150243 11.02 Taunton - Cardiff
57305+57304 14.00 Cardiff - Taunton
57304+57305 16.13 Taunton - Cardiff
57305+57304 19.00 Cardiff - Taunton
57305+57304 21.12 Taunton - BL (ECS)

Monday 14th June
Caped 07.05 BL - Taunton (ECS)

150243 09.12 Bristol Pkway - WSM
150243 10.10 WSM - Taunton (ECS)

On two separate occasions, a GBRf Class 66 had to deputise for one of the '57s' on the train, which operates in 'top and tail' mode between Taunton, Bristol and Cardiff. Looking at the Class 57 diagram for the week commencing 13th June, provides an insight into one of the worst weeks.

Friday 18th June
No. 57304 was repaired, reportedly with a new starter motor being fitted. Unfortunately, a shifted tyre on the brake vehicle was discovered on arrival at Taunton and rendered the set unusable for the remainder of the afternoon, an unknown unit is believed to have worked the 19.00 Cardiff to Taunton and then the ECS to Bristol.

To Lincoln with Grand Central?

Grand Central is interested in taking over the direct Lincoln to London services that have been abandoned by East Coast, Managing Director, Tom Clift, having revealed his company’s interest at a meeting of Railfuture Yorkshire.

Grand Central spokesman, Rupert Brennan Brown, said the company would be looking at using the paths that East Coast is vacating. "As I understand it, East Coast is proposing one train in the morning and one train in the evening between Lincoln and London, and four return services from London to Newark," he said. "It is Grand Central’s contention that this is not the best use of these paths and that it may be possible to serve other places by extending the trains beyond Newark. At the moment, we are trying to get clarity as to what the final proposed timetable is. There was a suggestion it would cost £9 million to run the services that have now been scaled down. We are trying to find out what opportunities there might be for us as an open access operator, which is not supported by the taxpayer".

Upwards for Bicester

The number of people travelling between Bicester and Oxford has exceeded all expectations since an enhanced service was introduced in 2009. Oxfordshire County Council was able to secure extra trains using funding from local developers. Bicester Town was the start or end of 105,329 journeys in 2009-10, up an impressive 73.7% from the 60,638 journeys recorded in 2008-09.
New Government to re-examine HS2 high-speed route

Following the new Government’s commitment to high speed rail, HS2 Ltd. has received a letter from the Secretary of State for Transport indicating how work, other than that on the London to West Midlands route already set out, should be taken forward.

Firstly, options are to be developed for connecting HS2 with Heathrow, both a line that goes directly through Heathrow and also a spur or loop from the recommended route. A case for an interchange at Old Oak Common will also be assessed and an indication shown of the service patterns for the route.

Secondly, options for linking HS1 with HS2 are to be assessed, and lastly, a comparative business case of a route extending from the West Midlands to Manchester and across the Pennines to Leeds will be assessed, and also a network with separate legs from the West Midlands to Manchester and Leeds.

Contract let for design and technical advice on ELL Phase 2

Designers and technical advisers for Phase 2 of the £30 million East London Line (ELL) extension to connect the existing route to the south-west with Clapham Junction has been appointed. Mott MacDonald will be providing detailed design for all civil engineering works for the new section of two-track line, which includes three bridge structures, several retaining walls, earthworks, drainage, trackwork, road and cycle paths, landscaping, noise studies and noise barrier design.

The service will cover civil engineering and systems up to the opening of the railway. The ELL currently runs from Dalston Junction, via the City and Docklands, to New Cross, Crystal Palace and West Croydon. Phase 1 was completed in May this year. Phase 1A, which will connect the network to Highbury & Islington, is expected to be completed in spring 2011. Phase 2 of is due to open during summer 2012.

Wandsworth upgrade

Plans have been submitted for a new entrance and ticket office at Wandsworth Town station. The project, which is being part-funded through the National Stations Improvement Programme, will include a Disability Discrimination Act compliant ticket desk window, plus the installation of ticket vending machines, automatic doors and automated ticket gates. Subject to the planning permission being granted and arrangements being finalised, it is hoped that the work will start later this year.

The event, the first open day at Wolverton for 17 years, takes place over the weekend of 14th/15th August.

Advance booking admission prices are £12.50 for Adults, £9 for children (under 16). Under 3s go free. Click here for full details of entry prices.

To download the PDF booking form for the ‘Wolverton Wanderer’ shuttles, click here. Completed forms should be sent to Transport Event Services, Lime Tree Lodge, Thorpe Road, Mattersey, Doncaster, DN10 5ED.

On a beautiful warm summer’s day, Class 60 No. 60071 Ribblehead Viaduct heads through the South Gloucestershire countryside at Wickwar, with the 05.05 Robeston-Westerleigh tanks on 17th June. Currently, it is one of six members of the class that remain operational. The others being Nos. 60009, 60010, 60011 (Immingham), 60049 (Toton), 60071 (Margam) and 60074 (North West). Edward Gleed
DRS Class 37/0 No. 37218 leads classmate No. 37259 on the 12.05 Sizewell - Crewe flask service through Ipswich on 19th June. The frequency of this train has increased lately, the working pictured being unusual in operating over a weekend. Keith Partlow

With Wrexham and Shropshire-livered Class 67 No. 67012 *A Shropshire Lad* as the train locomotive, Class 87 No. 87002 *Royal Sovereign* pilots the first leg of the 'Three Peaks Challenge' charter out of London Euston on 24th June, bound for Crewe, where it was detached, leaving No. 67012 to continue alone to Bangor. Stuart Chapman

On 21st June, the day that the Government announced its intention to sell HS1, the 17.13 Eurostar from Paris Gare du Nord to St Pancras International passes Singlewell Infrastructure Maintenance Depot, with Class 373 half-set No. 3018 leading. Visible on the powercar are vinyls to remember the 70th Anniversary of de Gaulle's BBC broadcast on 18th June 1940, when he appealed to his countrymen to fight on against Nazi Germany after the fall of France. The President of France and his wife came to London on 18th June this year to meet the Prime Minister and pay tribute to the support Britain gave to the Free French Movement. Bill Turvill

The Week Ahead

This coming weekend is notable for the long awaited main line return of BR 8P class Pacific No. 71000 Duke of Gloucester, which after a prolonged spell out of traffic returns on HF Railtours ‘Cumbrian Coast Express’ from Crewe to Carlisle on 3rd July, outwards via the Cumbrian Coast and returning across the Settle & Carlisle line. The Duke has undergone an intermediate overhaul at Bury, and has been ‘run-in’ during a number of visits to heritage lines.

Two days earlier, Steam Dreams feature No. 5029 Nunney Castle on the ‘Cathedrals Express’ from London Victoria to Worcester Shrub Hill. It was originally hoped to run outwards via the Cotswolds line from Oxford to Worcester, via Evesham, evoking memories of ‘Castles’ on the Paddington to Worcester and Hereford ‘Cathedrals Expresses’ of the BR era. Sadly, lack of paths and route improvements mean that the tour will now operate both ways over Sapperton, probably a more challenging itinerary for No. 5029 and one that is also a most credible alternative.

Railway Touring Company has two trains operating on 3rd July, each featuring double-heading. The second ‘Swanage Belle’ of three planned workings was scheduled for Sir Lamiel and Oliver Cromwell, but the continued absence of the Britannia means that No. 30777 will be partnered by either West Coast’s No. 46115 Scots Guardsman or ‘Black 5’ No. 44932 if its overhaul has been completed.

The ‘Black 5’ undertook a main line test in tandem with No. 48151 last week, before diverging at Worgret Junction onto the branch for Swanage. As Sir Lamiel is involved, the return will probably be into Waterloo. The Riley pairing of Nos. 44871 & 45407 feature on RTC’s other tour that traverses the Central Wales Line. Commencing at Leicester, it runs diesel-hauled to Crewe, where the ‘Black 5s’ attach to head the train through to Newport, via Shrewsbury, Llandrindod Wells and Cardiff. From Newport, the train is again diesel-hauled and operates via Gloucester and Birmingham New Street.

Saturday will also witness the rare appearance of an ex-GWR Pannier Tank on the main line, and on this occasion, hauling a train instead of banking it. The working is the centenary of the Bicester line, which opened on 1st July 1910, and provided the important infill between Banbury and Princes Risborough, which was to provide the GWR the opportunity to operate faster Paddington to Birmingham expresses, giving it the edge over its LNWR rival that operated out of Euston. Chiltern Trains sponsor the working, which will feature Tyseley’s 5700 class 0-6-0PT No. 9600 from Banbury to Bicester North and Princes Risborough, before the train heads to Chinnor on the Chinnor and Princes Risborough heritage railway.

VSOE has a British Pullman ‘Surrey Hills’ Luncheon booked for Friday 2nd July and rostered for Merchant Navy Pacific No. 35028 Clan Line. A statement from the MNLPS is reported elsewhere in this issue, in which they say that until the problem of the water feed to the boiler is satisfactorily resolved, Clan Line is effectively withdrawn from main line operations. Tomato was the last minute deputy on the last luncheon working for VSOE on 19th June, but the loco has a ‘Torbay Express’ booking on 4th July, which may curtail its availability to deputise on this occasion.

Modern traction tours operate to opposite extremes of the land, with Compass Railtours ‘Ayrshire Coast Express’ heading for Ayr from the Liverpool area, working over the Glasgow and South Western route through Dumfries to Kilmarnock and Troon with DBS Class 66 traction. As mentioned earlier, Tornado will be heading the ‘Torbay Express’ from Bristol Temple Meads to Kingswear on 4th July, and is booked to run every Sunday until 28th August, plus two dates in September and on 2nd October. However, 11th July has already been cancelled due to lack of bookings, the clash with the World Cup Final being cited as the prime reason.

Also commencing on 4th July is this year’s ‘Shakespeare Express’ season, which features two return workings between Birmingham Snow Hill and Stratford-upon-Avon. The train works to Stratford over the North Warwickshire Line, and returns via Hatton and Dorridge. As this is probably the last summer of semaphore signalling on the North Warwickshire line, it would be nice to see some of the trains, at least, revert to working back to Birmingham via Henley-in-Arden and Shirley. The season extends until 12th September. Tyseley’s in-house locomotive fleet is expected to dominate with the reliable GWR ‘Hall’ No. 4965 Rood Ashton Hall scheduled for the first two workings.

\[Castle class No. 5043 Earl of Mount Edgcumbe heads the empty coaching stock for Vintage Trains’ ‘The Red Dragon’ charter through Tyseley on 19th June bound for the start of the tour at Dorridge. The ‘Castle’ worked the train to Foxhall Junction, Didcot, where LMS ‘Princess Royal’ No. 6201 Princess Elizabeth took over for the remainder of the run to Swansea. Donald Taggart\]
DAY EXCURSIONS BY TRAIN

Travel to Salisbury on ‘the 20s Southern Circular II’ charter or visit Edinburgh with us in late Summer

SATURDAY, 14TH AUGUST - ‘The 20s Southern Circular II’
This tour is a must for fans of Type 1 haulage as a pair of DRS Class 20s take us to the cathedral city of Salisbury, via an interesting route along the Midland Mainline. Outwards our route should see us run via Virginia Water, Woking, Havant, Fareham, Eastleigh and Romsey. You will then have time to visit Salisbury before we return via Basingstoke, Mortimer, Reading, Slough and Acton.

PICK UP STATIONS are Barrow Hill, Chesterfield, Alfreton, Langley Mill, East Midlands Parkway, Leicester, Market Harborough, Kettering, Wellingborough, Bedford and St. Albans.

FARES: First Class £85 (£65 for juniors) and Standard Class £57 (£37 for juniors)

FRIDAY, 10TH SEPTEMBER - ‘The West Coast Premier’
A visit to historic Edinburgh behind electric traction, in the form of BR blue-liveried 87002 is on offer with this trip. The train takes a scenic run through the Cumbrian and Lakeland Fells, over Shap, then on through the Borders over the spectacular climb to Beattock and along the Cobbinshaw line into Edinburgh with distant views of the Forth Bridge. Edinburgh offers a world of shopping and award winning attractions like the historic castle or a tour around the Royal Yacht Britannia.

PICK UP STATIONS are Watford Junction, Hemel Hempstead, Berkhamsted, Tring, Leighton Buzzard, Milton Keynes Central, Northampton, Rugby and Nuneaton.

FARES: Premier Dining, First Class and Standard Class fares available starting from £57.

Ups & Downs by John Whitehouse

Preliminary details of two more tours featuring Hastings Diesel’s DEMU have been announced, commencing with a visit to Skegness on 18th September. This tour should operate from Hastings and the by now usual pick-up points to Tonbridge, and then Bromley South, Kensington Olympia and Finsbury Park, with a planned additional set-down at Wainfleet, before reaching the east coast resort. Later, on 4th December, again from the usual pick-up points from Hastings through to Tonbridge, and then Bromley South and Clapham Junction for a choice of St Albans, Bedford, or after a reversal, Bletchley. Use these dates as a guide however, as when details are confirmed a booking form for each tour will be available on Hastings Diesel’s website. The DEMU is also scheduled to be in action on 8th August on a charter from Hastings, via London Waterloo to Bournemouth and Poole in memory of Andy Piper. More details of this train are awaited, but it should be noted that Hastings Diesels is just providing the traction and is not involved in taking bookings.

West Coast is scheduled to provide a Class 33/37 tie-up for Spitfire’s ‘Whitby Jet’ charter on 10th July from York to the East Coast resort. The tour may also be picking up at Middlesbrough, although at the time of writing this has still to be confirmed.

The Merchant Navy Locomotive Preservation Society issued a statement on 19th June concerning the present situation with No. 35028 Clan Line. It followed the locomotive being declared unavailable to haul the VSOE ‘British Pullman’ working rostered for 19th June. The statement confirmed that although “a satisfactory test run had been undertaken earlier in the week, the Society was as yet unable to fully identify the cause of the reported intermittent boiler feed problems”. As a consequence, “until such time as they are able to identify and resolve the problem and the operational risk brought under normal control, the locomotive is not considered ready for regular service”. The statement adds that the MNLPS ‘is continuing intensive efforts to resolve the issue through a logical, analytical programme that is being shared with train operator DB Schenker’.
West Coast Railway operated a private charter on 18th June with three of the ‘Queen of Scots’ vehicles, behind Class 47/4 No. 47804. Here the Type 4 heads from Glenfinnan to Fort William, where a reversal took place prior to heading back to Carnforth. The train worked north from Carnforth on 15th June. Adrian Kenny
The 09.56 'Cathedrals Express' charter from London Victoria and return, via Canterbury West and Dover, approaches Swanley on Fathers Day, 20th June, hauled by A1 class Pacific No. 60163 Tornado. Brian Morrison
Peppercorn Pacific No. 60163 Tornado climbs easily towards the summit of Shap, as it passes Cowpathwaite with 'The Border Raider' charter to Carlisle on 26th June. The train returned via the S&C route. Richard Tuplin
Class 37/6 No. 37610 leads classmate No. 37608 (out of sight on the rear) through Lunan Bay on the first of a four-day Scottish landcruise trip, on 18th June. The tour had worked from Birmingham International to Inverness, via Alloa and Aberdeen, and as a result of a booked one hour layover in the Granite City, was on time at Inverness. Adrian Kenny
LMS 'Princess Royal' Pacific No. 6201 Princess Elizabeth powers up the incline from the Severn Tunnel with Vintage Trains' 'The Red Dragon' charter on 19th June.

NRM moves Mallard to Locomotion at Shildon

The National Railway Museum brought together two icons from the history of steam locomotives on 22nd June, and with a mere 71 years between them!

As part of a general change around at York Museum, Mallard was moved to Locomotion, the NRM at Shildon. To make the move all the more special, the world-famous ‘A4’ was posed in the museum yard with 15-month old Peppercorn A1 Pacific No. 60163 Tornado, prior to the ‘A1’ acting as motive power for the movement north. On 23rd June, hundreds of enthusiasts and members of the public crowded vantage points between York and Darlington as the convoy headed for Shildon.

The loan of Mallard to Locomotion, its first long-term visit away from York since 1975, is described by the NRM as being for the foreseeable future. In its place at York, will be South Eastern & Chatham Railway D Class 4-4-0 No. 737 and Pullman Car Company First Class carriage Topaz.

NSE ‘Gronk’ heads to Gwili

Believed to be the first visit to Wales by a Network SouthEast-liveried Class 08, No. 08631 Eagle has arrived at the Gwili Railway for the summer from its home base at the Mid-Norfolk Railway, and is expected to stay until the end of August.

With only one steam loco capable of hauling three and four coach trains up the steep gradients on the Gwili, the ‘Gronk’ has been brought in as the standby loco during the summer season.

In a rare passenger outing for the shunter, it will also be rostered for services during the line’s first diesel gala on 14th / 15th August, where it will be joined by fellow visitor Class 14 No. D9521, and resident Class 03 No. D2178 and the Pressed Steel Class 117 DMU.

Having made its first movements on the Llangollen Railway and only just missed the Gloucestershire Warwickshire Railway’s ‘GWR175’ celebrations, 2800 Class 2-8-0 No. 3803 stands in Toddington station on 20th June, awaiting departure time with the 14.15 service to Gotherington, the railway’s temporary southern terminus, following its landslide earlier in the year.

Ten Victorian cast iron columns from the original London Blackfriars station are being given a new lease of life in South Wales. Donated by Network Rail, the 124 year-old columns will be used by the Pontypool and Blaenavon Railway to construct a new station at Big Pit Museum. The columns will be returned to their former glory and repainted to their original colours of gold and black, becoming an architectural feature for the new station when it is built. This initiative comes off the back of the Thameslink programme that includes the redevelopment of Blackfriars. The columns were removed from the original and existing station building, which has been in operation since 1886. The Pontypool & Blaenavon Railway has made the headlines recently, with the opening of its new extension on which RSH Austerity 0-6-0ST No. 7169 of 1944 is seen as it climbs towards Furnace Sidings with the 15.00 departure from Blaenavon High Level on 20th June.

An award winning heritage railway
In a highly symbolic move, the Bluebell Railway is inviting members and the public to the site of its new station at East Grinstead on the evening of 6th July to witness the passing of the first train carrying the waste that was used to infill Imberhorne Cutting when the line was closed by British Railways.

The site will be open from 18.00 on the day, and members can pre-book tickets at Sheffield Park. Entrance on the night will be £2.50 subject to there being available space. The Bluebell station was actually due to open on 3rd July, but this has been postponed until September with the decision to concentrate on featuring the departure of the first waste train instead.

The railway is funding the clearance of the tip and the new northern extension by way of its 50th Anniversary Appeal and a 'Tenner for the Tip' campaign, full details of each are available on the special 'northern extension' website.

What a load of rubbish! First main line train to run to remove Bluebell Railway waste tip

Alycidon to star in GCR's 'Mail by Rail' event

The Great Central Railway’s star summer visitor, Deltic No. D9009 Alycidon, will set the pace for the line’s Mail By Rail Gala over 24th/25th July.

An intensive timetable will operate using the Deltic, visiting Class 26 No. 26007 and three steam locos.
